APPROVED for use
with telecommunications systems
run by British Telecommunications
in accordance with the conditions
in the instructions for use

IMPORTANT: THIS DOCUMENT SHOULD BE RETURNED TO THE CUSTOMER FOR RETENTION WITH THE INSTALLED SYSTEM.
ALTERATIONS SHOULD BE NOTED IN PENCIL.

Guidance Notes

1. Exchange line and Inter-switchboard extension/private wire list.

- Exchange lines will normally access Trunk Group 1 with access digit 9.
- Private wires/Inter-switchboard extensions will normally be allocated to Trunk Groups 2 and 3 respectively. Access digit normally 7, or 71/72 etc. in the case of two or more routes.
- Direct Inward Access (DIA). These exchange lines are allocated to individual extensions.

2. Class of Service.

There are three standard Classes of Service available as described.
Enter 1, 2 or 3 on the extension schedule as required.

It may be necessary to make up other C.O.S. (i.e. to include manual extension) from time to time.

3. Barring.

Discriminatory barring may be applied on an individual extension basis. There are three classes of barring available.

Barring 0 No barring. The extension is allowed unlimited dialled access.

Barring 1 Operator charged calls and IDD barred. Bars access to service codes that would allow any IDD call via an operator (i.e. 10, 155, 156, 157 & 158).

Barring 2 Operator charged calls, STD and IDD barred. Bars access to service codes that would allow any STD or IDD call via an operator (i.e. 10, 140, 155, 156, 157, 158, 190, 191, 193 & 197).

Enter 0, 1 or 2 on the extension schedule in the barring column as required.

The exceptions table should be completed in respect of any codes which are to be allowed. Only those local calls which cannot be made using short code routings should normally be entered.

4. Hunt Groups.

There are 6 Hunt Groups available.

Viceroy — Access codes 41-46 respectively have been allocated.

Kinsman — Access codes 441-446 respectively have been allocated.

Circular Hunting.

Enter only 1-6 in Hunt Group column C on extension schedule.

Terminal Hunting.

Enter 1/1, 1/2 etc. in the Hunt Group column T. The second digit denotes the order of hunting.

Note: Each Hunt Group may contain up to 8 extensions.

5. Mains Fail.

On Viceroy the first two extensions, and on Kinsman any two pre-designated extensions will automatically switch to exchange lines in the event of mains failure. If MF telephones, or Featurephones, are provided on these extensions, dial telephones must also be available to enable outgoing calls to be made under Mains Fail conditions.

6. Extension Metering & Call Logging.

Systems on which "real time", as opposed to "call timing", or Call Logging is required, meter pulses from the public exchange must be provided. The appropriate column of the exchange line list must be noted accordingly.

7. Pickup Group.

There are 7 Pickup Groups available. Enter 1-7 on extension schedule as required.

8. Direct Extension Selection.

Viceroy: All 16 keys may be allocated to extensions as required.

Kinsman: 9 keys only may be allocated.

Enter Console key number in appropriate column on extension schedule.

9. Merlin TX14 Featurephone.

Where a Featurephone is required the extension schedule must be noted, and one programming sheet completed per Featurephone.

Note 1: ONLY MERLIN TX14 FEATUREPHONES ARE PERMISSABLE ON VICEROY OR KINSMAN SYSTEMS.

Note 2: A MAXIMUM OF 8 FEATUREPHONES ALLOWED ON VICEROY AND 16 ON KINSMAN.

10. Users Limited Programming.

Customers are able to make the following changes to the system programme:

- | | |
|-------------------------|----------------------------------|
| 1. Extension numbering. | 4. Hunt Groups. |
| 2. C.O.S. changes. | 5. Direct Extension Select Keys. |
| 3. Pickup Groups. | 6. Discriminatory Barring. |

The information required to make these changes is contained in the Users Limited Programming section of the Console Operators Handbook *. Any alterations made should be noted in this booklet in the appropriate column.

* VICEROY (243) MER 37. KINSMAN (543) MER 38.

Class of Service

Individual extension users can be assigned features selected from 3 packages, ranging from the Executive or full feature package to the most restricted. The guide below is intended to aid the selection of the appropriate package for each extension or group of extensions. From time to time it may be necessary to make up other C.O.S. (i.e. to include manual extension).

Extension Features

C.O.S.

1 2 3
