British
TELECOM

IN TOUCH.

Neat, modern and very versatile, the Ambassador looks good in both a home or office environment.

It's a fully electronic press-button telephone with a handy personal directory pad incorporated beneath the handset rest.

The Ambassador also features a useful bell volume control, and a carrying recess which is ideal when

you consider how mobile your Ambassador can be. That's because it's fitted with new style Inphone plugs for use with the new style sockets.

These are fitted by British Telecom almost anywhere you want at a reasonable charge. An optional wall-mounting bracket can also be purchased.

IN TONE.

The Ambassador is available in stone, dark brown or mid grey.

INPHONE.™

The Ambassador, like all Inphones, is engineered to the highest standards and is fully tested and approved for connection to the British Telecom Network.

We do our best to supply our customers with the apparatus they ask for but we may have to provide apparatus which does not accord exactly with the descriptions, illustrations and shades of colours shown in this broadsheet.
