THE SMALL BUDGET

THINKS ITS

Any small business looking for a phone system that makes the very most of current technology without relying on unnecessary frills will be hard put to make a better choice than the Senator

The Senator provides up to five exchange lines and ten extensions and has been specifically designed to meet the needs of the small business that wants a faster, more efficient phone system but can't afford to dig too deep into its pocket.

With its range of useful features and its stylish FeaturePhones, the Senator will prove an ideal way to present a more businesslike face to the world.

TOP TEN TIMESAVERS.

Senator saves time as well as money. And the optional TX42 FeaturePhone (XpressCaller) will make life a great deal easier

With this phone, ten regularly used numbers, even long international ones can be programmed into your phone, and obtained, whenever you want, by pressing two buttons.

The same phone also allows you to repeat the last number you dialled (assuming, for instance, that it was en-

gaged) again simply by pressing two buttons.

Nothing could be simpler

Nothing could save more time and avoid more frustration.

OUT BUT STILL ABOUT.

Call diversion can, properly used, be an absolutely invaluable facility.

Supposing, for instance, that in a small, busy office, you need to go out for an hour or so. Or you're tied up in an important meeting.

Is whoever calls you going to end up wondering where you are? Or, even worse, getting no reply from your extension?

Senator solves this problem by allowing you to divert all your calls, internal or external, to another extension.

Even if you are, in fact, still at your desk but don't wish

No-frills doesn't have to mean no style. As you can see, the TX41 Standard FeaturePhone is very stylish indeed.

One button: one internal extension. That's how easy it is to use the Senator phone system. And that's how much faster it is too.

These lights allow you to tell instantly which exchange lines are in use and which ones are free.

The most important call of the day always comes when you've just popped out of the office. Now, with a simple combination of these two buttons, you can arrange for your calls to be diverted to another extension.

To set up a three way conference (with one outside line), just press this button, call the person you want to joint in, press it again your meetings in progress.

SENATOR. INPHONE. IN

GET SYSTEM THAT EXPENSIVE.

to be disturbed, you can divert your calls to a secretary or a colleague and still make internal or external calls.

Naturally, the Senator system allows any extension to take calls from more than one diverting extension, if necessary.

THE PERFECT PLACE TO MEET.

When you're trying to decide on the venue for a meeting, the phone isn't necessarily the first place you think of.

But, think a little further and you soon come to realise how efficient and convenient a phone conference can be.

Senator enables you to set up a three party conference between an outside caller and two internal extensions.

Once you've got into the habit, you'll wonder how you ever managed without it.

NO MORE INTERNAL COMPLICATIONS.

One of the advantages of a no-frills system is that it really can make life a lot simpler.

Take internal dialling, for instance.

Now, with the Senator there's no need to go through the operator. Or to have to press a complicated series of buttons or codes.

For extension six, just press button six. For extension two, button two.

It's that easy. And it's that much faster.

You're talking to someone on an external line and, at some point, you need to check a particular piece of information with someone internally.

No problem. With Senator you simply press a button, call the person you want to talk to, press another button and you're back in business.

You can also transfer an external call to another extension. Which means, in effect, that you're acting as an honorary operator.

Senator recognises that, in a small business, it's often a case of all hands to the deck.

STYLE. SIMPLICITY. AND SERVICE.

Having read this far, you'll appreciate what a great deal the Senator phone system has to offer. You'll also notice how stylish and how simple the FeaturePhones are.

But simplicity doesn't end on the surface.

Take the wall-mounted central control unit, for instance.

Quiet and unobtrusive, it's a far cry from the old days of enormous switchboards and bulky equipment cabinets.

And when it comes to installation, you'll find that unobtrusive is also the word. British Telecom engineers will install the system with the minimum of disruption.

So while they go about their business, you go about yours.
