INTOUCH.

The Rhapsody Inphone strikes the right note wherever you need it — in the home or at the office.

It's fully electronic with press-button dialling, and integral bell with volume control, and a discreet silence button which allows you to talk to others in the room without being overheard by the person on the other end of the phone

It also has an optional wall-mounting so it can be used where table-top space isn't available.

And when it comes to mobility your Rhapsody really moves with the times, thanks to its Inphone plug. This means it can plug into any and every new style Inphone socket which can be simply fitted by British Telecom at a reasonable charge.

INTONE.

The Rhapsody is of course in blue, as well as ivory, a light tan leather, or beige

INPHONE.™

The Rhapsody, like all Inphones, is engineered to the highest standards and is fully tested and approved for connection to the British Telecom Network.

We do our best to supply our customers with the apparatus they ask for but we may have to provide apparatus which does not accord exactly with the descriptions, illustrations and shades of colours shown in this broadsheet.
