IN TOUCH.

The Viscount (new standard) is the latest fully-electronic Inphone with sleek low lines and elegant styling, enhancing both home or office environment.

It's compact, lightweight and ultra modern in design with press-button dialling, adjustable tone caller and an optional wall-mounting bracket for real versatility.

Other clever features include a last

number redial button, a silence button for confidentiality and a note pad facility which will store the next number to be dialled while you're talking – ideal if you're getting information from Directory Enquiries.

It's very mobile too, thanks to new Inphone plugs, which plug in to Inphone sockets. These can be easily fitted by British Telecom, almost anywhere you want, at a reasonable charge.

IN TONE.

The Viscount matches the mood in four attractive shades – green, ice grey, tan or beige

INPHONETM

The Viscount, like all Inphones, is engineered to the highest standards and is fully tested and approved for connection to the British Telecom Network.

We do our best to supply our customers with the apparatus they ask for but we may have to provide apparatus which does not accord exactly with the descriptions, illustrations and shades of colours shown in this broadsheet.
