

The Berkshire Featurephone range from ascom making all the right connections

British built fully featured telephones provide the ultimate in features, service and reliability

The Berkshire range of featurephones from Ascom.

Whatever type of organisation you are in, the telephone is an essential business tool. Used every day, often for long periods of time, it must be reliable, easy to use and offer a range of features that are essential in business life.

The Berkshire Featurephone II

The executive Berkshire Featurephone II incorporates a comprehensive range of facilities, and offers the business user an exceptional service. This Featurephone also has an LCD Display, giving date, time and duration of call, a 24 number memory bank and line powered operation. Additional features are onhook dialling, full two way hands free speech, notepad facility and four separate alarms with self cancelling feature when activated.

It incorporates Pulse and Tone dialling and is TBR/ELR switchable. It has a 16 digit display with adjustable brightness and each of the 24 telephone number stores have a maximum 40 digit capacity. Additional features include tone caller with volume and tone controls, microphone mute, speaker volume and pause duration control, visual call indicator and a choice of non-display mode for all stored numbers.

The Berkshire Featurephone III

The Berkshire Featurephone III has all the features of the Berkshire Featurephone II model with the addition of an enhanced 42 number memory (30 named with designated buttons and a further 12 accessible through the keypad).

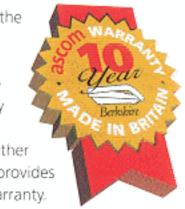

Like the Featurephone II it has excellent loud speech quality and is renowned for its clarity.

They both enjoy an enviable reputation within the Telecommunications arena, being extremely reliable with the added benefit of a superb backup service which is second to none in the industry.

BADGING. As a special service to corporate customers, Ascom is able to offer printing of logos. A team of specialists is available to assist with enquiries or advice on this service which allows organisations to 'own brand' instruments.

Made in Britain at Ascom's factory in Cardiff, the Berkshire Featurephone range is designed and manufactured to the highest standards.

Together with the ten year warranty it is your assurance of good quality and high reliability. No other manufacturer provides this level of warranty.
