# The Berkshire TeamLink Telephone System

*Ascom, the leading UK manufacturer of telephone handsets, offers the **Berkshire TeamLink** telephone system as a viable alternative to the PABX or Keysystem. Designed to take advantage of the many benefits Centrex has to offer, the **Berkshire TeamLink** provides an extensive feature list unrivalled by other telephones. The **Berkshire TeamLink** enables each user to monitor and answer all telephones and incoming lines within their working group ..... a reliable and cost effective solution, reducing resource requirements and facilitating teamwork.*

## *Berkshire TeamLink Offers*

Used in conjunction with your Centrex provider, the Berkshire TeamLink offers all of the features of a keysystem or small PABX. Call transfer, pick-up, on-hook dial, ring-back, mute, do not disturb, save number, voicemail, transfer to busy and divert, may be easily accessed via factory pre-programmed keys. Each telephone has indicator lights, enabling anyone in the team to see the status of each line; busy, line free, ringing.

## *Straightforward Installation*

The Berkshire TeamLink requires no digital line-cards or switch software, nor any additional line-plant. Each telephone can be configured to monitor the status of up to 10 Centrex lines<sup>1</sup> in a group, plus two additional lines, such as an auxiliary incoming line and one holding line. Any TeamLink in the group may be used to answer incoming calls to any other team member. Each telephone has twelve one-key external speed-dial keys, which may be customised to the user's requirements.

Take full advantage of brand awareness by branding the TeamLink with your company's logo.

Feature List
