

The **atl** Berkshire SD14  
*the UK's leading business telephone.*

# The **atl** Berkshire SD14

## *the UK's leading business telephone.*

Every business organisation relies heavily on the telephone as an essential business tool. The **Berkshire SD14** is the entry level telephone to the **Berkshire** range and is the obvious choice for any busy environment requiring a quality handset. Designed to meet high standards of reliability, and backed by a 10 year warranty, the **Berkshire SD14** ensures trouble-free operation and low cost of ownership.

### *Interchangeable Line Cord Flexibility*

Customer feedback has been telling us that decisions to go with CAT5 wiring were being hampered by the lack of cable and plug flexibility. This has led in some cases to a new telephone purchase or costly adaptor solution. The new SD14 can address your RJ45/BT/RJ11 interface problems with a simple line cord change, as indicated in the table below.

### *Switchable Message Waiting Option*

The Berkshire SD is available with Message Waiting selection to allow connection with industry standard PABX systems. With three system types to choose, flexibility is the key word that drives this popular option especially for customers with multiple sites to manage.

Standard Features		Comments

### *ModemPoint™ Option*

Popular with the Hotel industry, but equally at home in any business environment, the **ModemPoint™** provides convenient internet access to the busy professional with a portable PC.

The single-line **ModemPoint™** is the perfect solution for that additional point of connection you need on your desk, thus removing the need to search for a telephone socket or carry special adaptors. For individuals wishing to stay 'on-line' and still have access to the telephone, we can offer our two-line version.

Whether ordered as a complete telephone assembly, or as a retro-fit kit for your existing ATL telephones, the **ModemPoint™** combines flexibility with convenience - ask for details.

### *Badging*

In order to put your corporate image in front of customers, ATL offers a silkscreen print service for logo and instructional details. Use these powerful promotional tools to your advantage, while giving customers the "feel good factor" of knowing who to call first.
