5303 | Conference Phone

it's about **YOU**

Only Being There Is Better

Face-to-face meetings with your customers, colleagues and partners aren't always practical or possible. As a result, voice conferencing has become a common collaborative tool in companies large and small. Unfortunately, so has fumbling with conference unit controls and straining to hear a speaker over background noise. Until now.

The New Alternative For Superior Sound Quality

The Mitel Networks™ 5303 Conference Phone raises the bar on sound quality while lowering the barriers to effective collaboration. It's the only analog conference phone on the market with exclusive acoustic beam-forming technology that automatically focuses the microphone on individual speakers to eliminate annoying background noise and side conversations. Combined with built-in noise reduction, automatic gain control and full duplex operation, it supports discussions that are as close to being there as possible.

Features

Simplified, Feature-Rich Telephony Functionality

It supports a complete set of telephone features, from dialing, answering, transferring and placing calls on hold, to caller ID, redial and speed dial programming with Mitel Networks softkey technology.

Superior Voice Quality

It combines Mitel Networks' exclusive acoustic beam-forming technology, noise reduction and automatic gain control technology to focus the microphone beam on the lead speaker and eliminate background noise and side conversations; a freeze feature sets the microphone beam to remain on one speaker in presentation mode.

Natural Conversation

Full duplex operation supports natural conversation, allowing conference users to enter conversations without cutting off the other speaker.

Mitel Networks' exclusive acoustic beam-forming technology automatically focuses the microphone on the speaker, eliminating background noise and side conversations.

In presentation mode, the beam can be fixed on the presenter. LED direction indicators on the unit assure speakers that the microphone is on them.

Simplified, Full-Featured Telephone Access

The Mitel Networks 5303 Conference Phone is a full-featured phone that quickly plugs into any telephone wall jack or standard office telephone system. It features Mitel Networks-developed softkey operation with a backlit display to provide user prompts, customization, caller identification, speed dialing and more. The result is quite simply the most user-friendly audio conference solution on the market today.

Affordable, Superior Conferencing For Any Room or Office

The 5303 Conference Phone is the affordable yet sophisticated new alternative to traditional voice conferencing products. It is ideal for almost any environment in which conferencing is required, from a 10' x 12' office or meeting room to a 20' x 30' conference room – or even your living room. Thanks to its sleek, ergonomic design and Silver Ghost or Night Sky finish, it makes an attractive addition to the desktop or conference table.

Easy Operation/Controls

The detached control tablet allows for flexible use by any teleconference attendee in the room, while the large backlit display provides easy visibility of call information and functions.

Simple Installation

It installs in seconds, plugging into any standard analog RJ-11 telephone jack, or it can be used behind any PBX analog connection.

Direction Indicators

Integrated LED direction indicators provide conference participants visual confirmation that the unit is receiving their voice.

MITEL NETWORKS
it's about **YOU**

Companies don't make decisions, people do. That is why Mitel Networks is leading the way toward a new and more personalized approach to communications for enterprise and small business. Our innovative solutions, applications and desktop appliances enable you to access, process and control your communications and information naturally, simply and efficiently. Our solutions allow you to collaborate over distance and time and to interact with your customers, colleagues and partners as never before. By combining the power of voice, data and video over converged high speed networks, Mitel Networks provides you with flexible and personalized tools that let you leverage the latest advances for personal and organizational advantage.
