APPARATUS SCHEDULE.

Telephone No. 13. The description includes Bell, Magneto, 1,000 ohms; Generator Bracket, 3-terminal, unmounted; Coil, Induction, $\frac{25}{1}$; Transmitter; Cord, Flexible, No. 222; Receiver, Bell; and 3 fixing screws and washers.

2 Cells, 2-block, Agglomerate, Complete.

This Set, which is similar to Telephone, No. 3, but with a Generator and five extra Terminals fitted and wiring re-arranged, is suitable for Intermediate working, and is capable of performing the same functions as a P.O. Telephone with Granular Transmitter, "C," with the advantage of having a Generator, Magneto Bell, and accommodation for a Speaking Battery within the case. See Plate 76.
