

1909 Book Plate 85

Telephone No. 26.

The item includes Cord, Flexible, No. 402; Strip, Flexible Cord Connection, 4-terminal; and Telephone No. 28.

This instrument was intended for use on Telephone Exchange systems where the subscriber is called by Generator and calls the Exchange on the permanent current system. It is now used on C.B.S. Exchanges. See Plates 42 and 47.

The Bell is removable by taking off the dome and removing the two connection screws. Adjustment of the bell hammers is effected by means of two screws in the armature, against which the hammer springs are set.
