#### FIG. | TELEPHONE No.746F CIRCUIT DIAGRAM SHOWING CONNEXIONS AS ISSUED

#### NOTES:-

- A Telephone No.746R is supplied complete with a button engraved 'Recall' and a Switch No.5A-4. See Fig.3 for connexions as issued.
- B Telephone No.746F may be used in place of Telephone No.706 in all auto extension plans. The Telephone No.746F may also replace the Telephone No.710 when two buttons are needed and the latching facility of the Telephone No.710 is not required.
- C See Diagrams N848 and N4700 for the parts that can be added to the Telephone No.746.
- D When an extension bell is required, remove Strap BT3-BT4 and connect the bell to BT7-BT8. A Switch No.5A-3 with Button 3/DBU/264 may be connected blue to T17, slate and brown to T18 to control the extension bell. Where this arrangement is unsuitable a Switch No.2A may be fitted in a suitable position and wired to short circuit the extension bell.
- E The leads of auxiliary units should be terminated as shown on the appropriate diagram. Any spare lead should be secured to a spare terminal. Where this is not possible, the leads should be insulated from electrical contact with parts of the telephone and from each other. Where additional terminals are required, fit:—

l off Part 2/DST/836 2 off Part 2/DST/836 For Terminals T20-T25
For Terminals T20-T31

Loff Strip Conn. No.155A

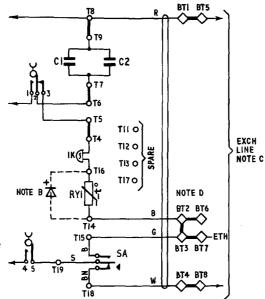

For Terminals T20-T37

- F With the exception of the handset, dial and bell, all components are mounted on a printed wiring board. The complete unit is available for maintenance replacement as a Telephone Unit D92732.
- G. Cland C2 may consist of two 0.9µF capacitors as shown, or a single 1.8µF capacitor.
- H Terminals T2A,T19A and T19B may be provided but are not used. (The Terminals are used in "746 style" push button telephones).
