Presentation of telephone numbers

Your exchange name should always be shown to prevent difficulties for callers who cannot yet dial you direct.

It is helpful to show your Subscriber Trunk Dialling (STD) code as well on personal stationery, letter headings, in advertisements, etc.; for example:

Ryde	12345 (STD Code 0983)
Brighstone	123456 (STD Code 0983)
Newport	123456 (STD Code 0983)
Niton	123456 (STD Code 0983)
Ventnor	123456 (STD Code 0983)
Wootton Bridge	123456 (STD Code 0983)
Yarmouth	123456 (STD Code 0983)

Although correct at the date this booklet went to print, charges shown are subject to revision and services may be modified, added to, or withdrawn. The information shown is not comprehensive; further details are published in the Post Office Guide. More comprehensive and up-to-date information may be obtained from your Telephone Area Office or Telephone Exchange. (International Telephone Exchange for International calls.)

Only dialling codes authorised for use from the telephone you are using may be dialled. It is an offence dishonestly to use the Post Office system with intent to avoid due payment.

List of local dialling codes

To call a number on your own exchange, dial only the number.

To call any other exchange in the following list, first dial the code, if any, and then the number.

Calls to any of the exchanges listed on this page are charged at local (L) rate.

List of local and trunk dialling codes

To call a number on your own exchange, dial only the number.

To call any other exchange in the following list, first dial the code, if any, and then the number.

A few of these codes are not yet available; in these cases you will receive a recorded announcement asking you to check the code with the operator.

The letter shown beside each exchange indicates whether the call is charged at local (L) or trunk (a, b & c) rates.

All-figure numbers

All-figure numbers

eg **021-246 8071**
061-246 8021

have been given to telephones in and around the cities named below. Please note that the all-figure number includes the figures preceding the hyphen; there is no separate dialling code.

*Charge
letter*

b London **numbers begin 01 –**
b Birmingham **numbers begin 021 –**
b Edinburgh **numbers begin 031 –**
b Glasgow **numbers begin 041 –**
b Liverpool **numbers begin 051 –**
b Manchester **numbers begin 061 –**

To call one of these numbers dial all the figures

Dialling to the Irish Republic

You can dial to exchanges in the Dublin area of the Irish Republic.

Telephone numbers in the Dublin area consist of 8 figures beginning with **(01)**
eg **(01) 75 91 97**.

What to dial

Dial the code **0001** followed by the required number leaving out any figures in brackets.

For example:

for **(01) 75 91 97** dial **0001 759197**.

International dialling

Countries that can be dialled

The countries you can dial and some of the places within those countries are shown in the following pages. If the place or country you want is not listed or if you have difficulties, ask the international operator, who will give you the information required or connect the call for you.

Many more places are listed in separate country leaflets which can be obtained free; dial **100** during normal office hours and ask for **Freefone 2013**.

What to dial

If the number you want is shown as an area telephone number, e.g. Brisbane Stock Exchange News – Brisbane 1193, refer to the following pages and dial the full code followed by the subscriber's number, thus:

Access code	Country code	Area code	Number
010	61	7	1193

If the number is shown as a national number e.g. Australia 07 1193 dial:

- 010 for access to the international network
- the country code as shown in the following pages (61 for Australia).
- the national number omitting the prefix digit '0' (or '9' in the case of Finland and Spain) ie 7 1193 in this example.

However, the prefix '0' **must** be dialled on calls to Andorra, Moscow and Tasmania.

If the required telephone number is noted in the internationally agreed way:

National	07	1193
International	+ 61	7 1193

dial 010 in place of the + sign followed by 61 7 1193.

Be patient

After dialling you may have to wait up to one minute before hearing a tone.

Tones you may hear

Ringling tone in Europe is of medium pitch and bursts of tone are evenly spaced with quite long pauses between them, whilst in North America, it has bursts of low pitched tone. On calls to France you may hear a series of rapid pips to advise that your call is being connected.

Engaged tone in Europe is of medium pitch but repeated at shorter intervals than ringling tone. In North America it is a medium pitched tone with short pauses.

Special information tone Three rapid pips in ascending pitch, indicates that a directly dialled call is not available. If an accompanying announcement is of no help, call the international operator.

For a free demonstration of tones, dial **100** and ask for:

Freefone 2070 for tones used in Europe

Freefone 2071 for tones used in North America.

Dialling to the UK from abroad

You will need to check whether you can dial calls to the UK from the telephone you are using. If you can, dial the international access code used in that country, the UK country code (**44**), followed by the STD code (omit the first figure '0') and the subscriber's number.

e.g. to dial 01-246 8041 from the Netherlands, dial 09 44 1 246 8041.

– Irish Republic	15 secs	42p	Normal charge applies

The charges shown above are exclusive of **Value Added Tax**. An amount in respect of **VAT** will be charged as an addition to customers' bills.

Notes

- 1 The charge for trunk calls is based on the duration of the call and the distance between charging centres.
- 2 Unless otherwise shown the charges for operator calls are for the first 3 minutes (or part), each additional minute (or part) being $\frac{1}{3}$ of the charge shown.
- 3 The charge for all calls connected by the operator is that in force when the call is originated.
- 4 All rates may be changed on certain days at Christmas and New Year.

The lower operator charge applies to calls that have to be connected by the operator because the caller cannot dial or because a dialled call has failed.

The normal operator charge applies to:

Calls which you choose not to dial yourself.

Special services (Transferred charge, Personal calls, ADC, Radiophone etc)

Calls to the Channel Islands, the Irish Republic or overseas

Calls subsequently connected by the operator after the caller in attempting to dial and the operator in attempting once to connect have both received the engaged tone or no reply.

Presentation of telephone numbers

Your exchange name should always be shown to prevent difficulties for callers who cannot yet dial you direct.

It is helpful to show your Subscriber Trunk Dialling (STD) code as well on personal stationery, letter headings, in advertisements, etc.; for example:

Ryde	12345 (STD Code 0983)
Brighstone	123456 (STD Code 0983)
Newport	123456 (STD Code 0983)
Niton	123456 (STD Code 0983)
Ventnor	123456 (STD Code 0983)
Wootton Bridge	123456 (STD Code 0983)
Yarmouth	123456 (STD Code 0983)

Although correct at the date this booklet went to print, charges shown are subject to revision and services may be modified, added to, or withdrawn. The information shown is not comprehensive; further details are published in the Post Office Guide. More comprehensive and up-to-date information may be obtained from your Telephone Area Office or Telephone Exchange. (International Telephone Exchange for International calls.)

Only dialling codes authorised for use from the telephone you are using may be dialled. It is an offence dishonestly to use the Post Office system with intent to avoid due payment.
